

## FHWA Contracts

### Multiple Work Orders Hydraulics, Hydrology and Bridge Scour

---

WEST Consultants has conducted several projects for FHWA. We metricated the HEC-14 Manual. We are also conducting all HEC-RAS training for the National Highway Institute west of the Mississippi River. We have provided preliminary lesson plans to FHWA on HEC-18, 20 and 23, which will lead to the development of two new NHI training courses.

We are rewriting HEC-9, on Debris Flow Structures. That effort will include adding state-of-the-art procedures for evaluating scour due to woody debris accumulation at bridges.
